

## Conic Sections and Analytical Geometry (Paperback)

Filesize: 9.61 MB

### ***Reviews***

*Excellent electronic book and helpful one. I could comprehend everything out of this published e book. I discovered this pdf from my i and dad suggested this book to discover.*

## CONIC SECTIONS AND ANALYTICAL GEOMETRY (PAPERBACK)

To download **Conic Sections and Analytical Geometry (Paperback)** eBook, you should refer to the hyperlink under and save the file or gain access to other information which might be related to CONIC SECTIONS AND ANALYTICAL GEOMETRY (PAPERBACK) book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 Excerpt: . have a common subtangent on the diameter VS9 because these points, when referred to this diameter and the tangent at its vertex, have the same abscissa, FJV, (Cor. 3, Prop. 6). The point M is therefore common to the two tangents and the diameter VS produced. By this construction we have formed the trapezoid PQQ P within, and the triangle TMT without, the parabola, and we will now compare the areas of these figures. From iV draw NL parallel to PQ, and from Q draw QO perpendicular to P Q , and let us denote the angle YV Q that the tangent at Vf makes with the diameter V1 Q by m. By the corollary just referred to we have FFgand V T =V Q . Whence T T= Q Q; and because N is the middle point of PP1 we also have 2 Therefore (Th. 34, B. I, Geom., ) the area of the trapezoid PQQP is measured by  $NL \times QO = NL \times Q Q \sin m = Q Q \times NL \sin m$ . But  $iVZ / \sin m$  is equal to the perpendicular let fall from N upon Qf Q which is equal to that from M upon the same line. Hence the area of the triangle TMT is measured  $T T \times NL \sin m = iQ Q \times NL \sin m$ . The area of the trapezoid is, therefore, twice that of the triangle. If another point be taken between Pf and V and we make with reference to it and Pf the construction that has just been made with reference to P and P,...
