Geographical chart is the second language of geography. it can provide more geographic information than the text description. High school geography curriculum standards explicit requirements to be fast. comprehensive. accurate access to the graphical language forms of geographic information. including the interpretation and analysis of the information carried by a variety of geographical chart. The skill is an important aspect of the geographical core skills. Geographic charts can be a multi-level access and analyze information. induction and evaluation of information. which can examine the students' spatial ability. logical thinking. analytical ability. geographic chart interpretation skills is one of the secondary school geography teaching focus. and previous college entrance examination content. View of the importance of the geographical chart interpretation capabilities. our intention to create a series of geographic high school chart is divided into two: the regional spatial orientation and geographical chart interpretation of the series does not include a map basics and the basics of the map graticule . First. concise and understandable language. the spatial orientation of the area explained the method of the regional spatial orientation skills and with a typical example. to facilitate students in emotional understanding of the regional positioning method because they have a complete theoretical understanding. And then from the regional memory method. the main regional map shows two aspects to help students to establish a mind map. improve the capacity of the regional spatial orientation. Finally. the practice often test area to consolidate the knowledge. Method book to explain in place. the classic example. area charts display a comprehensive. clear. practice implicit in the method call of a variety of regional positioning and integration of...
